STANDARD OPERATING PROCEDURE
Hot fill setup
Document No.: SOP-QA-8013
Revision: 02
Effective date: 2026-02-02
Approved by: Grace Okafor

1. PURPOSE
This procedure describes hot fill setup at the Northfield site.

2. SCOPE
Applies to production and warehouse staff.

3. RESPONSIBILITIES
Production owns this procedure; the
area supervisor approves it.

4. SAFETY
Keep the container closed when not in use.

5. PROCEDURE
Step 1: Verify the result in accordance
to the acceptance criterion.
Step 3: Check the area is clear of the previous product and its labels.
Step 4: Send the completed record to Quality by e-mail.
Step 5: Ensure that the second-person check is signed.
Step 6: The operator must be trained on this procedure before starting.
Step 6: Return unused material to the warehouse with its status label.

6. RECORDS
Records are kept for five years after batch expiry.
